关于我们 ABOUT US

宁波永生塑料机械有限公司创建于1998年，位于风景秀丽的港城宁波，地处沪杭甬高速公路旁，距离宁波栎社机场和北仑港码头不到半小时路程，交通十分便利。

公司拥有自主研发设计团队，采用三维软件设计，设备先进，并拥有高精度数控加工中心，员工精干，享誉业内。其董事自70年代即开始从事注塑机研究、设计、生产，致力于为客户打造高品质专业级个性化注塑机。公司现生产二十多种规格注塑机，锁模力范围70吨-1600吨，注射重量为80g-10000g多类注塑机，集机、电、液的最新技术于一体包括：K系列、伺服节能系列、薄壁系列、清(混)双色系列、BMC、PET、PVC、PC、瓶盖等系列专用机。整机配备日本、美国、意大利、法国、德国、台湾等国家和地区生产的液压和电控元件，具有高刚性、强锁模力、高注射压力、精密耐用等特点。使用永生塑机的客户遍布全球。

追求突破性与创新是永生塑料机械有限公司的一贯风格。我们追求在瞬息万变的科技领域中实际了解客户的需求，创新求变，精益求精。由于客户的支持与爱护，永生公司不断在稳定中成长，现已成为中国高品质的注塑机制造商之一。在此热忱期盼与您的合作，更期盼您不吝啬的赐教，使我们能更好地为您服务。选择永生，是您全方位提高市场竞争力的最佳选择。

Ningbo Yongsheng Plastic Machinery Co., Ltd. was founded in 1998, located in Ningbo city, China. It is by the Shanghai-Hangzhou-Ningbo Expressway, only 30 minutes drive away from Ningbo Lishe international Airport (NGB).

The Company has its own design team for independent research and development, has advanced equipment, applies the leading 3-D software for design and owns high-precision numerical control machining center. The directors of the Company started the research, design and manufacture of plastic injection molding machines in the 1970s, they are dedicated to create high quality professional personalized injection molding machine for the customer, and enjoys a good reputation in the industry.

Now, the Company produces various plastic injection molding machines more than 20 types, with mold clamp force ranging from 70 ton to 1600 ton and injection weight ranging from 80g to 10000g. Its product integrate the latest mechanical, electrical and hydraulic technologies into one, including K series, servo energy-saving series, thin-walled series, clear (mixed) double-color series, BMC, PET, PVC, PC and bottle-cap series machines. The complete machines are equipped with hydraulic and electrical control elements branded from Japan, the US, Italy, France, Germany and Taiwan, and have the characteristics of high rigidity, high clamp force, high injection pressure, high precision and being durable. Yongsheng plastic injection molding machines have many customers home and abroad.

Seeking for breakthrough and innovations in technologies is the constant style in our company. We are dedicated to supply the best project to meet customer's actual demands. With customers' supports and love, Yongsheng is growing up steadily and now is already one of high-quality plastic injection molding machine manufacturers in China. Here we expect cooperation with you. Any advice and suggestion will be appreciated by us.

01 稳定：双缸注射，性能可靠稳定

Stability: dual cylinder injection, perform stability and reliability

节能：高度优化的伺服节能技术，效率更高，单位能耗更低
Energy saving: high optimistic servo energy saving technology, higher efficiency and lower energy consumption.

安全：符合最新的国家安全生产标准，更加安全可靠
Safety: comply with the latest national safety standard, more safety and stability

高效：高度优化的合模单元，高速开合模更平稳，有效缩短循环周期
High efficiency: high optimistic clamping unit, high speed mold close and mold open more smoothly, greatly shorten cycle time.

精度：高度优化的机械结构配合高性能控制器，有效提升机器寿命和精度
Precise: high optimistic mechanical structure with high performance controller, greatly increase machine service life and precise.

为了产品品质的保证，永生公司配备了大量先进的检测设备和优秀的检验员与计量工程师，分布的产品制造的各个环节。机器出厂前都要进行连续运转试验，并且对于诸如锁模力、注射速率、预塑速率、开闭模速度等机器所有要求的参数和精度进行逐一检测，并记录在每个机器的质量档案中。始终要求出厂的机器达到百分之百的合格。

To ensure the product quality, Yongsheng has a lot of advanced testing equipments and excellent inspectors and metering engineers, allocated to each operation steps of product manufacturing. Before delivery, we carry out continuous running test of the machines, and test each parameter and accuracy, including mold clamp force, injection rate, pre-injection rate, mold opening and closing speed and record these parameters down in the quality file of each machine. We always require that each machine delivered to the customers is 100% qualified.

THE FOUR PARTS 四大部件

01

合模单元 CLAMPING UNIT

- 内卷五支点曲肘式锁模结构，大大提高锁模部分结构刚性和精度。
 - 箱式桥梁结构活动模板及高刚性全连体后模板，经有限元分析强化，保证模板不易变形且经久耐用。
 - 拉杆由优质合金结构钢镀硬铬制成，高强度且耐疲劳。
 - 配备低压模具保护装置。
 - 多段锁模压力、速度及位置控制。
 - 液压油马达驱动齿圈调模。
 - 多种液压顶出模式。
-
- Internally-rolled 5-point double toggle mold clamp structure, greatly increases rigidity and precision of the mold clamp unit.
 - With box type bridge structure, moving platen, and high-rigidity continuous rear platen reinforced through finite-element analysis, we guarantee that the mold platens are not deformable and are durable.
 - The tie rods are made of high-quality structural alloy steel plated with hard chromium, with high mechanical strength and fatigue strength.
 - Provided with low-pressure mold protection device.
 - Multi stages controlling of mold clamp pressure, speed and position.
 - Mold thickness adjusted through ring gear driven by hydraulic oil motor.
 - Several hydraulic ejection modes.

02

注射单元 INJECTION UNIT

- 采用双导柱支承，双缸平衡注射装置，保证螺杆注射前进过程中受力平衡、均匀。
 - 优质合金氮化或镀铬螺杆、氮化料筒，耐腐蚀及耐疲劳，大大增长使用寿命。
 - 喷嘴对中微调装置。
 - 高扭力液压马达驱动螺杆预塑装置。
 - 多段注射速度、压力、位置设定。
 - 针对不同特性工程塑料，提供专用螺杆料筒，确保制品成型品质。
-
- Use of double guide posts and dual-cylinder balance injection device, guarantees that balanced and uniform forces are applied on the screw during injection and moving forward.
 - High-quality alloy screw nitride or with chromium plating, and nitride barrels, are protected against corrosion and fatigue, which greatly increase their service life.
 - With fine adjustment of nozzle centering.
 - Screw preplasticizing driven by high torque hydraulic motor device.
 - Multiple injection speed, pressure and position settings.
 - Special screws and barrels are provided according to different properties of engineering plastics to ensure the molding quality of finished products.

03

润滑单元 LUBRICATION UNIT

- 采用容积式电动润滑器，自动集中润滑，油路分配均匀，润滑效率高，增长曲肘寿命。
- With use of volumetric electrical lubricator, automatic centralized lubrication and uniform oil distribution in the pipeline, the machines have high lubrication efficiency and long toggle life.

04

液压单元 HYDRAULIC UNIT

- 采用世界著名品牌油泵及控制阀，精密控制液压机构的力、速度及方向，确保整机准确性、可靠性、稳定性和耐用性。
 - 定量泵控制系统，输出稳定、高响应。
 - 主要液压元件、密封件均采用世界知名品牌。
 - 管路布置更为合理美观，维修保养容易。
-
- Well-known oil pump and control valves in the world are used, to execute accurate controlling over the force, speed and direction of hydraulic mechanism and ensure the accuracy, reliability, stability and durability of the machine.
 - Control system of the constant displacement pump ensures steady outputs and high response. Main hydraulic elements and seals are international well-known brands.
 - The pipelines are arranged more reasonably and better, and thus ensure easy maintenance.

YS SERIES MACHINE TYPE INTRODUCTION

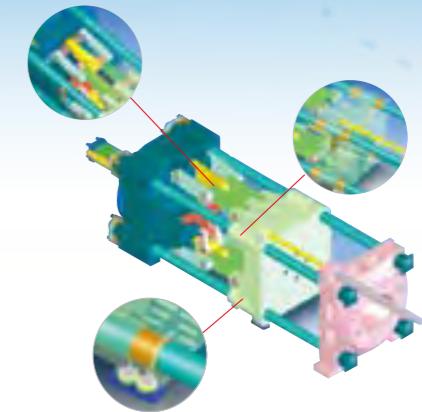

永生 YS 系列机型介绍

YS 系列节能注塑机

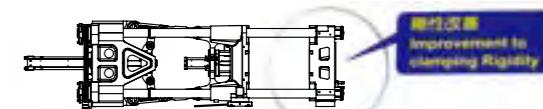

YS系列采用箱式桥梁结构活动模板及高刚性全连体后模板，经有限元素分析能防止模板变形，耐疲劳，重复精度高，合模力分配均称，制品精度高，大大延长模具寿命，降低了制品成本。

YS SERIES ENERGY-SAVING INJECTION MOLDING MACHINE

YS series has moving platen featuring box type bridge structure and full-connected rear high-rigidity mold platen. Through finite element analysis, it can prevent deforming of mold platen, resist against fatigue, have high repetition accuracy, distribute mold closing force uniformly, greatly increase mold's service life and reduce the molded parts cost.

V6系列伺服节能配置

V6 SERIES SERVO ENERGY-SAVING CONFIGURATION

根据产品、成型条件的不同，伺服节能注塑机比传统定量泵注塑机相比，最高节能可达70%，相比变量泵注塑机节能可达40%。

Depending on different products and molding conditions, plastic injection molding machines with servo energy-saving configuration can save at most 70% energy and 40% as compared with respectively traditional machines with constant displacement pump and the machines with variable pump.

电控箱 CONTROL CABINET

- 性能卓越
- 人性化操作
- 多国语言系统支援
- High performance
- User friendly
- Multi-language system available

高刚性锁模机构

大幅提高夹模系统之刚性强度，确保射出成型过程中磨具的最小变形量。

High-rigid Clamping Unit

Upgrade the rigidity and strength to assure the mild minimal deformation during molding process

结构特性 STRUCTURE FEATURES

高刚性夹模系统设计，比旧式机种提高30%的机构刚性，确保磨具寿命。

The high rigid clamping design upgrade its rigidity to 30% stronger than conventional ones, and free from deforming molds.

YS V6 SERIES

ENERGY SAVING HIGH-PRECISION INJECTION MOLDING MACHINE

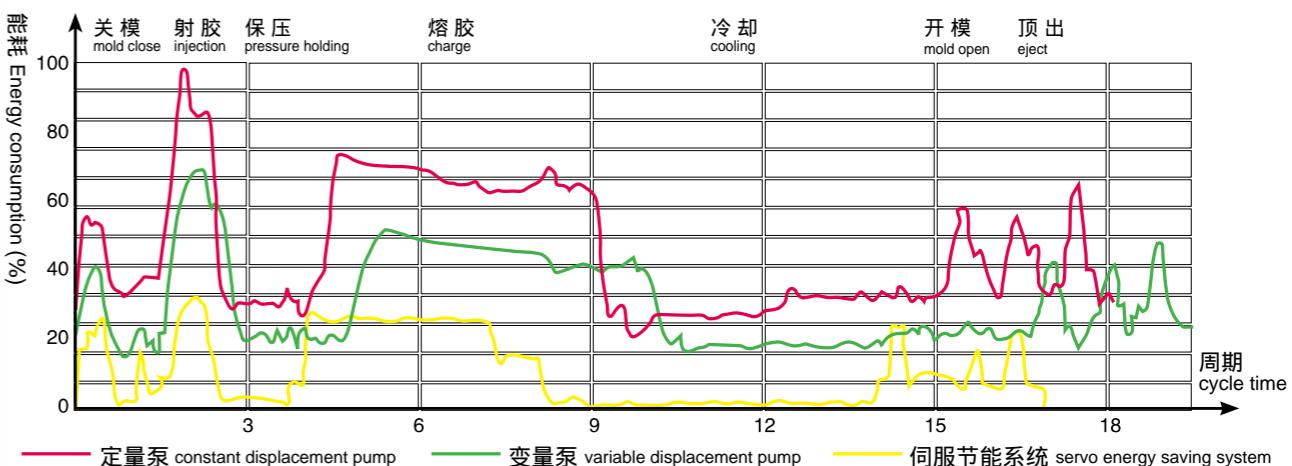

YS V6 SERIES

ENERGY SAVING HIGH-PRECISION
INJECTION MOLDING MACHINE

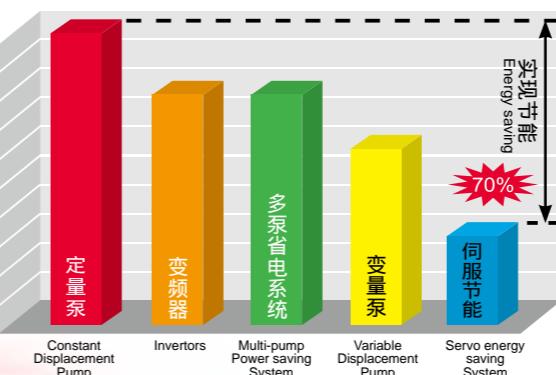

永生 V6 系列伺服节能精密注塑机

功率消耗曲线比较图 TEST OF ENERGY EFFICIENCY

耗电量 Power consumption

注：射出量按聚苯乙烯比重1.05计算；因产品不断改良，参数变更时恕不另行通知。

Notes: The Shot weight is based on polystyrene at specific gravity of 1.05. For product improvement, the parameters are subject to change without prior notice.

节能效果比较 TEST OF POWER-SAVING

根据产品、成型条件的不同，伺服节能注塑机比传统定量泵注塑机相比，最高节能可达70%，相比变量泵注塑机节能可达40%。

According to different products and molding conditions, servo power-saving injection molding machine can save 70% more power than traditional constant displacement pump injection molding machine, and 40% than variable pump injection molding machine.

耗电量比较 COMPARISON

注：使用右述各项节能系统的最佳条件：保压时间长、冷却时间长、一分钟2~3模以内的产品、厚件产品等，上述各种方法的节能效果才能显著。

Remark: To achieve best performance of those power saving system, production should be in this case : Long pressure holding time, long cooling time, and productivity less than 2~3 cycles within one minute, thick walled products. These power saving systems will have outstanding efficiency.

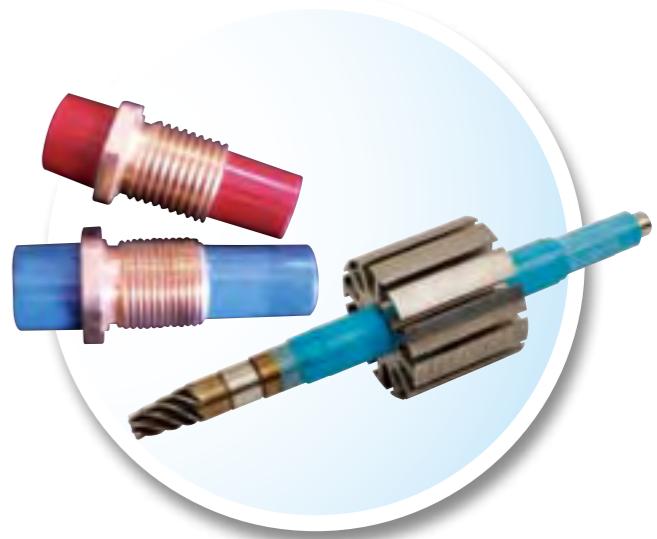

RESPECTED AND SUSTAINABLE

BMC是以特殊不饱和聚脂为主的热固硬化性树脂，具有耐高温、耐燃性、耐蚀性、高机械强度、尺寸安定、电器绝缘等特性。可应用于汽车类零件、电子工业、家用电器及通讯器材的外壳及零件。

BMC (Bulk Molding Compounds) is one of the thermosetting plastic material. BMC has many properties including Heat-resistance, Flame-retardant, Erode-resistance, High Mechanical Strength, Dimensions Stability and Electrical Insulated. It is widely used into kinds of industries including Automotive parts, Electronic parts, Household appliances and Communication equipment.

**CLEAR TWO-COLOR CURTAIN
SPECIAL INJECTION MOLDING MACHINE**
清双色门帘专用注塑机

**CLEAR THREE-COLOR CURTAIN
SPECIAL INJECTION MOLDING MACHINE**
清三色门帘专用注塑机

射出两组及开合模均采用线性电子尺，可准确控制开合模及射出行程。

Injection of the two groups and mold opening/closing are carried out by using linear electronic transducer, allowing accurate control over mold opening/closing and injection stroke.

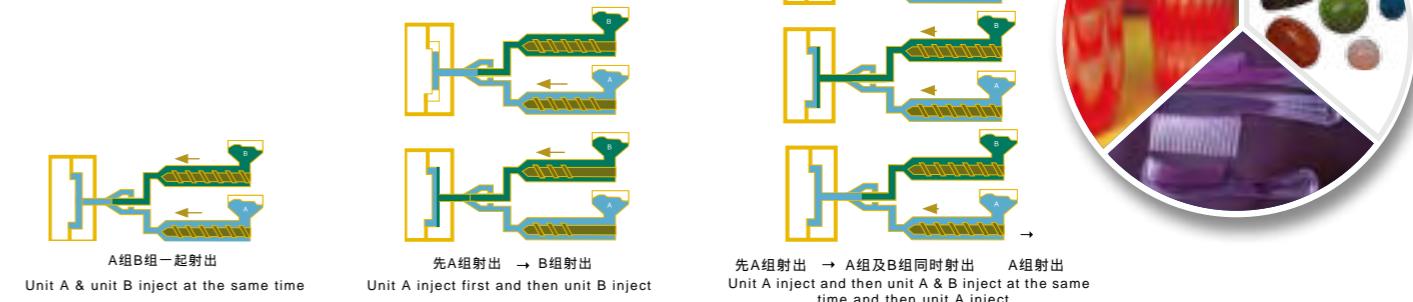

此设计结构为我公司专利（严禁仿冒）：在高压注射时，高压熔体作用在活动喷嘴上（上下2个喷嘴），该活动喷嘴通过弹簧的压紧力将活动喷嘴前端紧紧压在模具浇口上，以达到防止漏料的目的，无需人工校正，提高了产品稳定性及生产效率，降低了生产成本。

The structure design is our company patent which prohibits copy. The high pressure melted material contact the movable nozzle while high pressure injection. The movable nozzles are upper and down ones that get its front end firmly pressed with the mould gate using pressure force from the spring. This is to prevent material leakage without necessity to have it revised manually. Greatly increase the product stability and productivity, and lower the production cost.

YS H SERIES

**DUAL-COLOR INJECTION MOLDING
MACHINE FOR SPECIAL PURPOSE**
永生H型混双色注塑机（特种机）

H型系列混双色注塑机 H Series Dual-color Injection Molding Machine

混双色成型机特点:

- 具有两组独立比例控制系统，使用时分别控制两组的射出压力及速度。
- 可选择散射、齐射、点射及交替注射，成型出各种不同的花色。
- 射出两组及开合模均采用线性电子尺，可准确控制开合模及射出行程。

Characteristics of Yongsheng mixed dual color plastic injection molding machines:
 1. Two groups of proportional control systems independent from each other, can respectively control injection pressure and speed of the two groups.
 2. With optional scattered injection, centralized injection, dotted injection and alternative injection, different patterns can be molded.
 3. Injection of the two groups and mold opening/closing are carried out by using linear electronic transducer, allowing accurate control over mold opening/closing and injection stroke.
